

Google Play Store App Publishing Guide (From Step 2)

Prepared for developers who want to successfully publish their Android applications.

2. App File Requirements

You must upload your app as an Android App Bundle (AAB). APK files are mostly deprecated.

Ensure your app targets the latest Android API level and does not crash during testing.

3. Store Listing

Provide a clear app title (max 30 characters), short description (80 characters), and full description (4000 characters).

4. Graphic Assets

You need an app icon (512x512 PNG), feature graphic (1024x500), and at least 2 screenshots.

5. Privacy Policy

A privacy policy is required if your app collects data, uses internet, ads, or permissions.

6. App Content Declaration

You must declare your target audience, ads usage, and complete the Data Safety form.

7. Google Play Policies

Avoid misleading content, spam, copyrighted material, or harmful behavior.

8. Ratings and Reviews

Use in-app review features to allow users to rate your app.

9. Important Links

Your app link and developer page link will be generated after publishing.

10. Monetization Rules

Ads must not disrupt user experience or trick users into clicking.

11. Testing Requirement

You may need at least 12 testers for 14 days before public release.

12. Publishing Steps

Upload your app, complete all sections, test, and submit for review.

13. Review Time

Review usually takes 1–3 days depending on the account.
